

vs.

BLEACH

*In a head-to-head comparison, **Gtech Clean** is over 30 times more durable, requires 90% less product, takes 99% less time to apply and saves an average of over \$2,300 annually!*

Gtech vs. Bleach Cost Analysis

	Cost/Liter	Applications/Year	# Liters needed/Year	Annual Cost	Application Labor	Application Labor/ Cost per Application	Annual Cost for Labor
Gtech	\$21.41	12	2.25	\$48.17	10 minutes	\$1.84	\$22.08
Bleach	\$.68	365	22.8	\$15.58	35 minutes	\$6.45	\$2354.25

Bleach is a mixture of sodium hypochlorite and various peroxide-producing compounds. Bleach kills quickly, but has no extended durability profile. As well, bleach releases VOC's – the gases that burn eyes, and smell terrible. Furthermore, the chemicals in bleach permanently denature microbes which gives them the capacity to evolve to "superbugs"!

Gtech is a technology shown extremely effective against Bacteria, Fungi, Algae, and Virus with a durability profile second to none!
